In 1920 we purchased the entire stock of another nursery. Among thousands of plants there were just five Yew. As these developed we were impressed by their color, vigor and texture. We tried to purchase more Yew elsewhere, but found them rare and difficult to obtain. When the depression struck in 1929, we found growers more willing to part with some of their plants for cash, and we bough some of every variety we could find. We have continued to add new kinds until now we grow more than forty varieties of Taxus, after discarding the few that proved undesirable in our climate. We specialize in the growing of Taxus, and endeavor to give our customers the benefit of what we have learned about this wonderful plant during the past forty years.
